

HALAL STATEMENT

Pure Ethyl Alcohol/All Proofs

Ethyl Alcohol sold by Greenfield Global USA Inc. is derived by physical, microbiological, mechanical, or enzymatic processes. A multistage distillation process performs separation and purification of the final product. Ethyl Alcohol is produced at an industrial chemical plant, it is not extracted from alcoholic beverages.

In addition, the following process statements about the ethyl alcohol production can be made:

- Raw materials used in manufacture of ethyl alcohol are not of animal origin.
- Raw materials do not contain nor come in contact with products of animal origin at any point of the manufacturing process.
- Ethyl alcohol production does not involve use of bacteria or solvents in the manufacturing process.
- Manufacturing facilities producing and processing Ethyl Alcohol do not handle any products of animal origin.

HALAL refers to any object permissible to use according to Islamic Law. While alcoholic beverages are viewed as intoxicating agents and are not permitted, small amounts of industrial ethanol might be allowed in certain manufacturing applications.

This statement applies to pure Ethyl Alcohol products that are not Halal certified. Determination of suitability of any Greenfield Global USA Inc. products for any application is at the discretion of the end users. Please contact your Halal Certification Authority to obtain definitive clarification of this matter.
