

STATEMENT: Various

To whom it may concern:

A quién le interese:

BTSA, BIOTECNOLOGÍAS APLICADAS, S.L. hereby declares that:

BTSA, BIOTECNOLOGÍAS APLICADAS, S.L. declara que:

The Bioxan® range comply with the following statements:

PFAS (perfluoroalkyl substances)

To the best of our knowledge the product does not contain perfluoroalkyl substances (PFAS) in its composition. Regarding the packaging used, please note that they all comply with the European Regulations on materials and articles intended to come into contact with foodstuffs: Regulation (EU) 10/2011, Regulation (EU) 1935/2004 and Regulation (EU) 2023/2006, including their latest amendments. Therefore, the packaging used does not contain perfluoroalkylated substances (PFAs) in its composition.

Perfluoroalkylated substances (PFAs) are a large group of synthetic compounds consisting of a hydrophobic alkyl chain of variable length (fully or partially fluorinated), with a hydrophilic end group. These substances are widely used in industrial and consumer applications including stain-resistant coatings for textiles and carpets, paints and varnishes, furniture, shoes, lipophobic coatings for food contact paper products, fire extinguishing foams, surfactants for mining or oil wells, floor polishes and insecticide formulations.

In cosmetic there are no established limits for these substances in Regulation (EC) No 1223/2009 of the European Parliament and of the Council of 30 November 2009 on cosmetic products & its latest amendments.

Our HACCP system which complies with both, FSSC 22000 and public health authorities, has been developed based on the type of risk that all our raw materials and processes have. For this reason, PFAs have not been assessed as they do not present a risk to our products.

CITES compliance

Is in compliance with the Convention on International Trade in Endangered Species of wild fauna and flora (CITES), signed in Washington on 3 March 1973.

All the ingredients come from sustainable sources and none of them are obtained from specimens of CITES-listed species.

Hydroquinone free

To the best of our knowledge it does not contain hydroquinone in its composition.

*Disclaimer: "This statement reflects the best knowledge and belief of BTSA and no replaces the applicable legal requirements. The contents of this document do not relieve the receptors of this document or any other person or organization from complying with their legal obligations".

CMR

Does not contain EU Category 1A, 1B or 2 Carcinogens, Mutagens or Reproductive toxicants (CMR). Therefore, it is in compliance with Regulation EC/1272/2008 & EC/1223/2009, and its latest amendments.

Proposition 65

Is conformed to the Proposition 65 "Safe Drinking Water and Toxic Enforcement Act of 1986", administrated by The Office of Environmental Health Hazard Assessment (OEHHA). The product is not subjected to significant exposures to chemicals that cause cancer, birth defects or other reproductive harm.

On behalf of BTSA, Biotecnologías Aplicadas, S.L.,

Quality Department.
