

Sultan Restaurant - Traceability plan

- Purchasing Halal food from Jetro and local Butcher
- Delivering it myself by designated business car
- Store the grocery on shelves, put meat and frozen grocery in freezer
- On a daily basis, we take the meat or vegetables from freezer or fridge, prepare them on preparation table, marinate them and put them back in the fridge to be used for that specific day, bring them upstairs in the kitchen, put them in the preparation fridge to be ready to be cooked.
- After cooking, the food will be ready for pickup or to be delivered or to be served.
