

	<b>PEST CONTROL</b>	
	PROGRAM 8	Effective: 01/10/2020  Replace: 04/01/2016

In addition to our Pest Control Provider’s program, **Sadler’s** has adopted a pest control program that includes our additional defenses and checks our Pest Control Provider’s equipment to ensure the maximum pest defense possible.

Sadler’s owns illuminating fly lights. Our service provider’s equipment includes bar coded interior traps, illuminating fly-traps, and bar coded exterior bait stations. We receive their service every week. Our checks will be at a minimum of once a month to ensure all devices are in place, operating correctly, and monitor any activity between service visits.

A map of the facility and the location of all traps will be kept current by Pest Control Company. The Sadler illuminated traps will be serviced on an as needed basis. Any deficiencies and/or activity will be reported to Quality Assurance Management. Any corrective actions listed will be handled within 7 days of notice unless otherwise documented on a continuous improvement plan. Necessary information will be entered into our service provider’s “request log” section of their logbook.

INTERIOR TRAPS: Technician will check for activity, damage, functionality, position should be perpendicular to the wall, flush with the wall and the entry holes visible from either side.

INTERIOR ILLUMINATING FLY LIGHTS: Technician will ensure the apparatus is plugged in, light is on, count the approximate number of insects, and change the fly paper if necessary.

EXTERIOR BAIT STATIONS: Technician will check for entry clearance—no obstacles preventing the effectiveness of the station, activity, position, and damage.

**Pest Control Providers Duties and Tasks:**

**Interior Traps:** traps maintained/serviced weekly

**Exterior Traps:** bait stations maintained/serviced monthly

**Fly Traps:** illuminating traps maintained/serviced weekly

- Change bulbs in units as needed
- Power-spray the dumpster area on a monthly basis April thru October or as needed
- Power-spray the exterior of the building as needed for the control of flying and crawling insects

**Fogging for control of insects:** Performed on an as needed basis or upon request.
