

Albadawi Restaurant

Halal Product Recall Plan

Introduction: Albadawi Restaurant maintains a recall plan which provides specific procedures, defines terms, and assigns roles and responsibilities when a food safety issue arises with any of our products.

Objective: To protect our Halal Consumers' (HC) health to maintain the authenticity of our Halal Product Facility (HPF), we must quickly detect, isolate, and handle any product contamination.

Scope: The plan will be activated whenever a potential recall requirement arises and includes the following elements:

1. Recall committee member designations
2. Recall responsibility assignments
3. Key personnel and external contact information
4. Recall procedures
5. Communication templates Success of the plan relies on the proper execution of plan elements and up-to-date information.

Determining the Contamination: It is Albadawi's responsibility to ensure the identification of all products and quantities of products implicated in the recall. In addition, determination should be made if any other codes, brands, or sizes of product handled by the company are affected.

Notification of Affected Parties:

The recall will be reported to the appropriate halal certification agencies and food safety authorities. Regulatory Agencies will be notified at the earliest opportunity after the decision has been made to conduct a recall. Consumers will be notified by the most effective method available.

Removal of Affected Product:

The procedure for product removal can be divided into five components including: removal, control, and disposition of affected product, recall effectiveness, and recall termination.

Examination: When Albadawi restaurant chooses to retain recalled product, control must be regained to prevent reentry of the product into commerce. Albadawi restaurant is responsible for determining whether the recall is effective. Recall Effectiveness Checks verify that all consignees have been notified and have taken the appropriate action.

Records: Full paperwork of every stage of the recall procedure, from identifying to solution, will be recorded.
