Technician Comments:

Greeted Tim upon arrival, no sightings reported. Inspected all interior devices, discovered very light fly and gnat activity caught in light traps. Replaced glueboards in tincat monitors as needed, due to dust and water damage, to keep fresh for prevention and monitoring of general pest activity. Tincat 43 crushed by loading gear. Removed and replaced with new equipment to maintain proper working condition. Inspected all exterior devices, replenished bait in stations as needed to keep fresh for prevention and monitoring of rodent activity. Spoke with Tim about today's findings. Service completed, thank you and have a great day!

Appointment Notes

Kapture Pest Control is committed to the safety of our customers and our environment. All materials used by Kapture Pest Control have been registered by the Environmental Protection Agency. Please avoid unnecessary contact with materials and comply with all instructions and recommendations from our technicians. Thanks for your patronage! National Emergency Poison Control: (800)222-1222
