Granulated Sugar

Granulated sugar is made by crystallizing purified/filtered sucrose syrup which is then dried and screened to produce the dry free-flowing granulated sucrose. Sweetener Products again screens this refined product for our packaged forms, removing the ultra fine and ultra coarse granules producing a consistently uniform granulation profile.

Typical Analysis

Moisture (% by Drying)	<0.05%
Invert (% max)	.03
Sucrose (%)	>99.8
Color	White
Microbiological	Meets NSDA and NFPA Standard

Typical Granulation Screen Size % Retained (Cum.):

On US 30	0-30
Thru US 80	0-5
