A Recall is Voluntary Action Conducted by a firm to remove adulterated or misbranded meat and poultry products from commerce.

Identify customers to be contacted in the event of a recall. A suggestion is to maintain a list of names, phone numbers, mail addresses, and email for contacts.

Describe and explain your system for determining which ingredients went into which products:

we have food recipe for each product that way we know what ingredients we have in each product

Describe and explain your system of any lot coding applied to finished products. If lot coding will not be used, indicate by stating "none":

we have the date of the production with lot number to identified the product

Describe and explain your system for documenting distribution of your finished products. If there is no system in place, indicate by stating "none":

Expiration date

Lot number

How would you be notified of any recalls for the ingredients that you use?

FSIS newsletter notification send to all usda plan

How will you contact the customers who received affected products?

email/phone

Identify information to be communicated in the event of a recall such as:
(to be completed with relevant detail in the event of recall)

- o Identity of the affected food:

_____ with notify the lot number of the product that its been recalled our company grab
all the unsafe products from the market

- o Reason for recall:

Product it is not safe - Need to get back to the facility

Plan Implementation and Revision Date: 1-15-24
