

Flowchart of Processing
Rozy Beauty LLC
340 Prospect Ave, Avenel NJ, 07001

Start

↳ Initiate the traceability process for halal products.

Receiving Products

↳ Products arrive at the facility from verified halal-certified suppliers.

Label Verification

↳ Check the halal certification label on products.

- **Is the label correct?**
 - Yes → Continue.
 - No → Correct and verify label.

Verify UPC Codes & Barcodes

↳ Scan the product's UPC code and log it for accurate tracking.

Designated Storage

↳ Store products in designated halal-certified areas with clear labeling.

Expiration Date Monitoring

↳ Record and monitor expiration dates of all received products.

- **Is the product expired?**
 - Yes → Remove from inventory.
 - No → Continue.

Double-Check System

↳ Team conducts a second verification before products are sent out for dispatch.

Product Dispatching

↳ Verify the halal product labels and send products out for delivery.

Logging Documentation

↳ Log the following information for traceability:

- Supplier details (halal certification).
- Date received and production date.
- Expiration date.
- Unit amount.

Audit & Inspection

↳ Regular audits and inspections to ensure compliance with halal standards.

End

↳ Complete the halal product traceability process.
