- 7.1.1 Follow the color-coding designations ensuring you are using the correct colored Bucket and Brush before cleaning (Green).
- 7.1.2 Prepare cleaning solution by filling up a cleaning bucket with five gallons of clean water and then carefully adding 20oz of DFP-32 into the five-gallon bucket of water.
- 7.1.3 Take the designated brush whether for the floor or walls and dip the brush head end into the prepared solution until it is completely coated.
- 7.1.4 Take the coated brush and begin to clean.
- 7.1.5 Use a water hose to rinse off the surface of the area that has been cleaned. Be mindful of any electrical outlets or equipment be sure to cover if needed.
- 7.1.6 Use a Squeegee to clean up the water used and make sure to pull all water to the nearest drain.
