

Halal Sanitation Protocol – Guangzhou NEWNAIL COSMETICS CO., LTD

A. Personnel (HPH – Halal Product Handlers)

Objective: Ensure that any personnel handling halal products maintain full hygiene and prevent cross-contamination.

Sanitation Measures:

- HPHs must wear clean lab coats, gloves, hairnets, and face masks while handling any halal materials.
 - Hands must be washed and sanitized with alcohol-free sanitizer before entering the halal processing zone.
 - Entry to halal zones is restricted to trained HPHs only.
-

B. Equipment (HPE – Halal Product Equipment)

Objective: Ensure all tools, machinery, and contact surfaces are clean and maintain halal integrity.

Sanitation Measures:

- All equipment is used exclusively for halal nail polish production.
 - Equipment is sanitized before and after each batch
 - Dedicated tools and containers are not shared outside the halal production zone.
 - A sanitation log is maintained, signed off by the quality assurance team.
-

C. Products (HP – Halal Products)

Objective: Preserve the halal status of products from production to shipping.

Sanitation & Contamination Control:

- All bottles, caps, and brushes are sanitized prior to filling and kept sealed until use.

- Products are stored in clean, sealed containers in a designated halal-only area.
-

Assurance of Compliance

- The production facility is a **halal-only environment**. No non-halal materials are stored, used, or transported within the premises.
- Regular sanitation and hygiene inspections are conducted and documented.
- Full traceability of ingredients, batches, and sanitation records is maintained
