COMPANY BACKGROUND

Halal Watch World LLC is a halal certification limited liability corporation based in the state of New York, and has operated in the certification industry since 1990. HWW is an organization that stands upon the trust of the Muslim public, and believes that it is imperative that their trust never be jeopardized. We maintain standards to the highest degree of scrutiny and perform regular audits for the protection of our constituents.

Halal Watch World understands that halal certification is a communal obligation (فرض كفاية), meaning, at least one person of the community must uphold it. If no one takes up this responsibility, the entire community bears a burden of sin. Therefore, we must be extra diligent with this effort. We realize the seriousness of the matter and understand the dire consequences of not filling this duty to the fullest capacity. God explains this to us in the Holy Quran by His statement:

“And say not concerning that which your tongue says falsely: 'This is Halal and this is Haram,' so as to invent lies against Allah. Verily, those who invent lies against Allah will never prosper...A passing brief enjoyment (will be theirs), but they will have a painful torment.”

[Al Quran] 16:116-117

HWW ensures to the best of its ability a high level of authenticity is upheld. This allows them to gain the trust of the Muslim community, and garner strong relationships with companies who produce, process, and distribute halal products at all levels. By this, they are able to offer halal producing company's guidance and consultation on the direction of their processes and products, while ensuring that Islamic dietary standards are always maintained and monitored. Muslims can use this information in order to make well informed decisions about what they choose to eat.

Legal Filings: Halal Watch World holds registered trademark number 4728733, and Department of State (New York) number 4814343. Halal Watch World is also a registered halal certifying organization with The Department of Agriculture and Markets of New York State (See supporting documentation).

We begin in the name of God SWT

CERTIFICATION CONSIDERATIONS

There are 4 main factors taken into consideration when determining the halal status of a product:

Is the product/ingredient Halal Aslan (by default)?

If the product is Halal by default, then there will be no ingredient investigation conducted. An audit of the HPF (Halal Product Facility), facility related documents and product identification documentation will however, still be required.

Is the product/ingredient Halal certified via another organization?

If another organization certifies the product as Halal, then it is incumbent upon us to perform a *tahqeeq* (verification) certification of the establishment. We must be able to ascertain that the certifying body is competent and capable of determining the status of such products. In the event that we are unable to gain this information, our organization must inspect the location of production before certifying.

What is the Risk Assessment of the Facility?

Each HPF (Halal Product Facility) must be assessed and assigned an appropriate level of risk. Each facility is graded according to assessed risk. As risk increases, guidelines, restrictions, and measures become more stringent. Risk is determined according to the products present in the facility, product and process management, and the equipment utilized for processing. Any product/s made with or derived from the items mentioned below would be considered Haram:

1. Human derived ingredients
2. Pork
3. Donkey (excluding the Onager)
4. Animals with fangs or talons (Carnivorous)
(Excluding Hyena and Fox according to school of thought)
5. Animals not slaughtered according to Islamic ritual rites
6. Carrion
7. All forms of filth (Najis) i.e. Urine, Excrement, Blood, Pus, Vomit, etc
8. Insects (other than locusts)
9. Animals fed with more than 50% of any of the above without being fed on a pure diet for a stipulated number of days (The Jallaalah)
10. Any intoxicants
11. Anything toxic or harmful to the body (such as cigarettes)
12. Anything processed, made, produced, manufactured, and/or stored using utensils, equipment, and/or machinery in contact with

any of the above that have not been cleansed according to standards which remove contaminants.

HiRF: High Risk Facility

Any facility that utilizes item/s listed above or a derivative thereof within the HPF and processes both halal and haram products using indifferent tools, machinery, or utensils. Thus, HiRF's by nature involve contaminants in some way in its processing.

MeRF: Medium Risk Facility

Any facility that processes both halal and haram products using segregated tools, machinery, or utensils to the exclusion of items listed above. Facilities that process any of these items, even if segregation methods are employed, are to be deemed HiRF's.

LoRF: Low Risk Facility

Any facility that does not process haram products on or inside of the premises.

As mentioned earlier, in relation to each risk level there are guidelines, restrictions and measures in place for the avoidance of contamination. Before any facility or any product made in said facility can be considered Halal suitable or certified Halal, these guidelines will have to be strictly adhered to.

Regarding contamination, products cannot be cooked upon or within the same utensils without proper cleansing. This means that any liquid substance that interacts with non-halal products becomes contaminated. This includes oil, and other wet cooking surfaces. Thus, if a vat of oil is used to cook non-halal products (which is considered as filth), it cannot be used to cook Halal products without contaminating it.

Are there any contents in the product that contain impermissible ingredients?

We refer to the list of impermissible consumables on the previous pages. If the product under audit is found to contain any of the ingredients on the ban list, these products cannot be considered as halal, unless said ingredients are replaced with halal suitable alternatives.

Client Details: Aviva Natural Supplements

FACILITY PROFILE

Aviva Natural Supplements is a USDA certified turnkey organic contract manufacturer headquartered in New Brunswick, NJ. We specialize in custom formulation, custom blending, encapsulations etc...

PRODUCT PROFILE

Megaton Women Tablets

Megaton Women Tablets (MR185_NU1328)

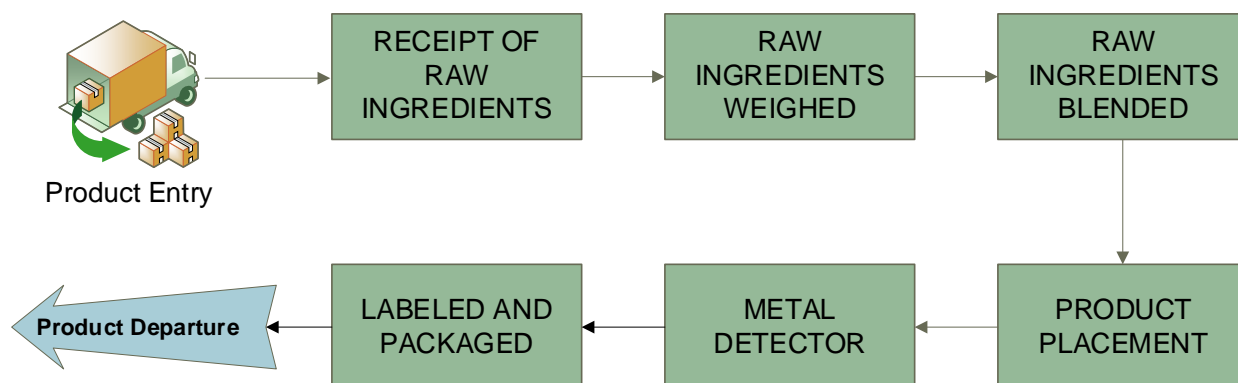

No Description provided.

- **INGREDIENTS:**

- INGREDIENT 5092 | Vitamin A Palmitate 500,000 IU (Xiamen Kingdomway Biotech)
- INGREDIENT 5093 | Beta Carotene 20% (ZMC)
- INGREDIENT 5094 | Vitamin C DC 97% (CSPC Healthcare Inc.)
- INGREDIENT 5096 | Vitamin D3 100,000 IU (Suan Farma (Fermenta Biotech Limited))
- INGREDIENT 5097 | Vitamin E (D-alpha Tocopheryl Acetate) 700IU (Jiangsu CONAT Biological Products Co, Ltd)
- INGREDIENT 5098 | Vitamin K1 5% (PAT Vitamins (Shandong Guangtongbao Pharmaceuticals Co.))
- INGREDIENT 5099 | Vitamin B1 Mono (Thiamine Mono) (PAT Vitamins (Xinfa Pharmaceutical Co))
- INGREDIENT 5100 | Vitamin B2 Powder (PAT Vitamins (Hubei Guangji Pharmaceutical Co))
- INGREDIENT 5101 | Inositol Hexanicotinate (Trafa Pharmaceuticals LLC)
- INGREDIENT 5102 | Vitamin B6 HCL (PAT Vitamins (Xinfa Pharmaceutical Co))
- INGREDIENT 5103 | Folic Acid (Trafa Pharmaceuticals LLC)
- INGREDIENT 5104 | Vitamin B12(Cyanocobalamin) 1% (CSPC Healthcare Inc.(Hebei Huarong Pharmaceutical))
- INGREDIENT 5105 | Biotin (JIANGXI TIANXIN PHARMACEUTICAL CO.,LTD.)
- INGREDIENT 5106 | D-Calcium Pantothenate (Hangzhou Xinfu Science & Technology)
- INGREDIENT 5107 | Di Calcium Phosphate (C2C Nutra (Innophos))
- INGREDIENT 5108 | Iros as Ferrous Fumarate (C2C (Sudeep))
- INGREDIENT 5109 | Iodine as Potassium Iodide (C2C (Deepwater Chemicals))
- INGREDIENT 5110 | Magnesium Oxide (C2C Nutra)
- INGREDIENT 5111 | Zinc Oxide 80% (C2C (EverZinc))
- INGREDIENT 5112 | L-Selenomethionine 0.5% (Sabinsa Corporation)
- INGREDIENT 5113 | Copper Oxide (Trafa Pharmaceuticals LLC (Puneet Laboratories))
- INGREDIENT 5114 | Magnesium Amino Acid Chelate 20% (Trafa Pharmaceuticals LLC)
- INGREDIENT 5115 | Chromium Amino Acid Chelate 10% (Trafa Pharmaceuticals LLC)
- INGREDIENT 5116 | Molybdenum Glycinate Chelate 2.5% (Trafa Pharmaceuticals LLC)
- INGREDIENT 5117 | Potassium Chloride (C2C (Morton Salt))
- INGREDIENT 5118 | Boron Amino Acid Chelate 5% (Trafa Pharmaceuticals LLC)
- INGREDIENT 5119 | Para Amino Benjoic Acid (PAT Vitamins (Changzhou Sunlight Pharmaceutical))
- INGREDIENT 5120 | Vanadium Amino Acid Chelate 0.5% (Trafa Pharmaceuticals LLC)
- INGREDIENT 5121 | Lutein Beadlets 5% (KEB Biotechnology (Inner Mongolia Ever Brilliance Biotechnology))
- INGREDIENT 5122 | L-Glutathione (Reduced) (Shandong Jincheng Bio-Pharmaceutical Co, Ltd)
- INGREDIENT 5123 | Microcrystalline Cellulose (C2C (JRS Pharma))

- INGREDIENT 5124 | Stearic Acid (C2C (Tropical Network Sendirian Berhad))
- INGREDIENT 5125 | Croscarmellose Sodium (C2C (JRS Pharma))
- INGREDIENT 5126 | Silicon DiOxide (Silica) (C2C (Solvay USA Inc))
- INGREDIENT 5127 | Magnesium Stearate (C2C (Faci Asia Pacific PTE LTD))
- INGREDIENT 5128 | Tracite™ Trace Mineral Powder (MLG50) (Mineral Logic, LLC)

PROCESSING OVERVIEW

CLEANING METHOD

Description:

- A. All cleaning equipment, brushes or scrub pads must be maintained in good condition. Discard any damaged or soiled brushes or scrub pads.
- B. Only paper towels will be used for wiping the equipment. Cloth rags will be used for warehouse and other cleaning operations.
- C. Store all cleaning utensils and tools in labeled covered bins to prevent contamination.
- D. Product-contact surfaces for equipment used in wet-processing operations must be cleaned and sanitized. Cleaning and sanitizing of these surfaces are required before use and after any interruption during which the contact surface may become contaminated.
- E. Cleaning and sanitizing agents used to clean equipment must be approved for food contact use. See Approved Chemical List PD-004-F1.
- F. Single-service cleaning articles such as wipes and paper towels must be stored in appropriate containers, dispensed, used, and disposed of immediately in a manner that protects against contamination of components, dietary supplements, or any contact surface.

Frequency: Daily/As Needed.

CONCLUSION

Client was cooperative and compliant with all relevant documentation requests. All documentation has been analysed during this review. Aviva Natural Supplements's product/s are deemed to be Halal compliant and suitable.

Based upon this information, the review team hereby recommends Halal certification for all products mentioned in this report.

My signature below is a testimony that the information provided herein is factual to the best of my knowledge.
